

Thieves[®]

Foaming Hand Soap

Product Summary

A natural hand-cleansing formula, Thieves Foaming Hand Soap contains Young Living's Thieves blend, a potent combination of clove, cinnamon, rosemary, *Eucalyptus radiata*, orange, and lemon essential oils, all known for their powerful cleansing properties. Thieves essential oil blend penetrates deep beneath the skin's surface, providing a long-lasting barrier of protection. This gentle foaming hand soap also contains ingredients such as vitamin E, aloe vera, and *Ginkgo biloba* to moisturize and soften the skin.

Product Story

Liquid hand soaps are a big trend in the personal care industry, particularly those with antibacterial properties; however, most soaps contain harmful chemicals and fragrances, leaving many searching for a natural, safe alternative. Thieves Foaming Hand Soap is formulated with natural ingredients, including the power of Thieves, which has been university tested and found to be highly effective against bacteria.

This product has been dermatologist tested and found to be safe for all skin types, including sensitive skin.

Primary Benefits

- + The essential oils in Thieves penetrate deep into the skin to act as a protective barrier long after you wash your hands.
- + Thieves Foaming Hand Soap is pH balanced, which reduces the disruption of the skin's

natural moisture complex and leaves important lipids in place to maintain a proper moisture balance in the skin.

- + Vitamin E, aloe vera, and *Ginkgo biloba* are added to condition and protect the skin.

Who Should Use This Product?

Thieves Foaming Hand Soap can be used by children and adults, including those with sensitive skin, for natural and effective cleansing.

Did You Know?

- + *Eucalyptus radiata* is primarily composed of eucalyptol, a substance shown to be very effective against bacteria in topical applications.
- + Extra lemon essential oil is added to Thieves Foaming Hand Soap for its high level of d-limonene, a natural solvent, to help with the removal of dirt and germs, and because of its uplifting and fresh scent.
- + Thieves Foaming Hand Soap's primary surfactant, decyl glucoside, is derived from corn sugars and sugar beets, and is often used in products for sensitive skin.

Key Ingredients

Young Living's Thieves essential oil blend (containing clove, lemon, cinnamon, *Eucalyptus radiata*, rosemary, and orange essential oils), Aloe Barbados leaf juice (aloe vera), Tocopheryl Acetate (vitamin E), Retinyl Palmitate (vitamin A), and *Ginkgo Biloba*.

Thieves® Foaming Hand Soap

Complementary Oils

Thieves Essential Oil Blend

Diffuse Thieves essential oil blend in the home to keep the air clean and free of toxins. For centuries, the oils in Thieves have been used to ward off illness. In modern times, these oils have often been the subjects of antibacterial and antifungal research.

Complementary Products

Thieves Household Cleaner and Thieves Spray

Surface cleaning is just as vital as hand washing in keeping your home clean and safe from illness. Thieves Household Cleaner and Thieves Spray can be used to clean many surfaces in your home, including toilets, tubs, sinks, doorknobs, floors, and countertops.

Thieves Waterless Hand Purifier

Proper hand hygiene is just as important when you're on the go. Now, Thieves essential oil has been combined with a unique blend of all-natural ingredients to create a safe and highly-effective waterless hand purifier.

Frequently Asked Questions

Q I have heard that essential oils can be very drying to the skin. Will the essential oils contained in Thieves essential oil blend dry out my skin if I use this soap?

A *No, actually its effects are quite opposite. Because essential oils can be drying to the skin, specific ingredients such as aloe, vitamin E, and Ginkgo biloba were added to restore moisture.*

Q Why doesn't Thieves Foaming Hand Soap have a thick lather like other foaming soaps?

A *Many people are under the impression that thicker lather means deeper cleaning, when in fact, it is primarily the other ingredients and not the lather that is cleaning the hands. The ingredients that cause soap to foam are called surfactants, and rich foaming surfactants are made from synthetic ingredients, which may be irritating to the skin. Thieves Foaming Hand Soap is formulated with natural surfactants, derived from sugar beets, so it gently and effectively cleanses the skin.*
